

# Smarter AI for a better experience that powers efficiency

Digital workplace solutions are meant to enhance user experience and facilitate IT teams so they can focus on business-critical tasks.

Lenovo AI-powered Digital Workplace Solutions (DWS) adapt to each employee's unique, ever-evolving needs. That leads to lower costs and better performance.

DWS that helps your organization achieve 30% reduction in costs<sup>1</sup>

## Your ultimate employee experience

Employees are twice as engaged

and more likely to stay

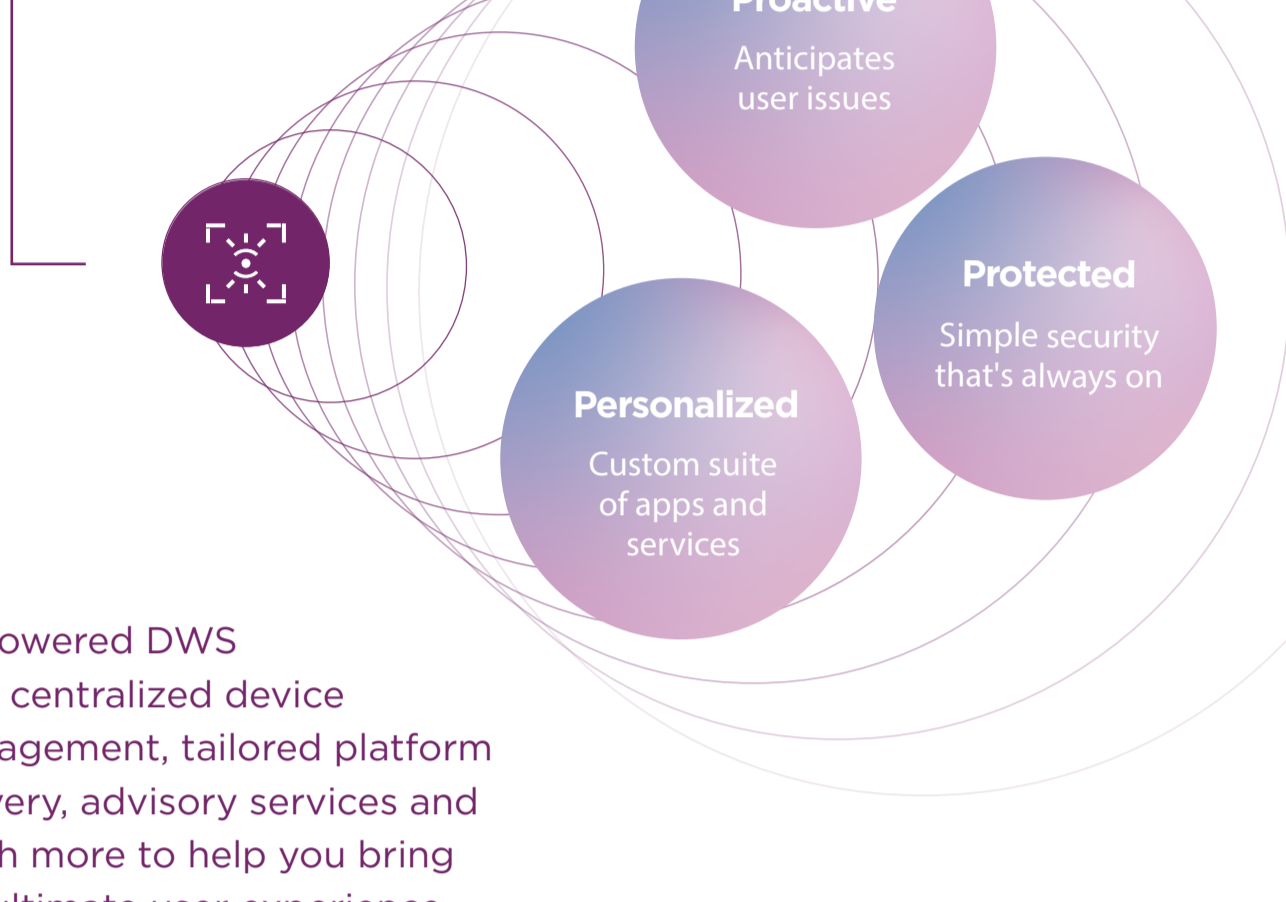

# 2x

# 3+ years

if they feel they have technology that supports them at work.<sup>2</sup>

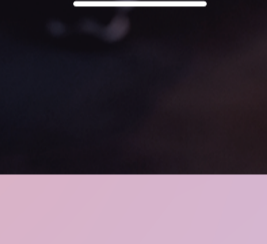

## How AI brings it all together

AI-powered DWS uses centralized device management, tailored platform delivery, advisory services and much more to help you bring the ultimate user experience to your workforce.

## Care of One™ AI: Solutions, personalized

With Lenovo's AI-powered delivery platform, employees get an optimized experience tailored for them and protected with preemptive AI-powered issue resolution.

# 40%

Proactively resolve 40% of issues before they happen<sup>3</sup>

## It's Smarter AI for all.
